## Programmer & Engineer

I am a professional computer programmer seeking a full-time position in the field of computer technologies. I can effectively solve the problems and optimize the code. I am both adept at the understanding of data structures, algorithms, back-end & front-end developments as well. I enjoy being challenged and engaging with projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me. My attention to detail, organizational skills ensure the success of each project assigned to me.
